# Critical View of Safety Criteria

| Criteria | 0 points | 1 point | 2 points w/photo example |
|---|---|---|---|
| **Two structures connected to gallbladder** | Unable to identify 2 structures or only 1 structure seen | 2 structures connected but some overlap | 2 structures clearly seen connected to GB  |
| **Cystic plate clearance** | Not visible | Visible but overlapped by structures or not clearly shown | Bottom 1/3 of gallbladder is clearly demonstrated and cystic plate is shown.  |
| **Hepatocystic triangle clearance** | Tissue in triangle obscures view of structures | Some obscurement of triangle | Hepatocystic triangle cleared of all tissue except the cystic duct and cystic artery  |
