

EXPERIENCE
THE GANGA
CENTRE OF EXCELLENCE
IN TRAUMA

From July 2025 - Duration: 5 Days
Ganga Hospital, Coimbatore

Centre of Excellence

Ganga Hospital

TRAUMA AND ACCIDENT SURGERY

Dr. (Prof) S Rajasekaran
Chairman,
Dept of Orthopaedics

Ganga Hospital has a state of the art orthopaedic trauma unit catering to a large population of the western zone of Tamilnadu and its adjoining states. Complex trauma cases are referred from remote frontiers of India and neighboring countries like Bangladesh, Nepal, and Maldives.

Dr. (Prof) S Rajasekaran Chairman, Department of Orthopaedics Trauma and Spine Surgery, has been instrumental in building and shaping the Orthopaedic Department into a busy clinical unit with strong academic and research components.

Dr. J. Dheenadhayalan
Senior Consultant

The trauma team is headed by Dr. J. Dheenadhayalan, Senior Consultant, who joined the department in 1992 after basic training at Mysore Medical College. He completed advanced training at Nuffield Orthopaedic Centre and Milton Keynes General Hospital UK, and fellowship training in joint replacement at Tubingen and Regensberg, Germany. He is a Founding Member of the APOA trauma section, past President of TamilNadu Orthopaedic Association & Education officer of AO Trauma India.

The unit has 10 dedicated operation theatres for trauma surgeries as well as 3 theatres dedicated to emergency surgeries and open injury management. The 24/7 availability of trauma anaesthetists, plastic surgery consultants and orthopaedic consultants enables the unit to provide resuscitation and appropriate management for all major injuries at any time of the day. The consultant level input from patient arrival allows critical decision making and ensures the right management for complex injuries. Many lives are saved during the “Golden hour” by expert resuscitation and early damage control surgical care.

Academic trauma meetings are conducted three times a week and all surgical trauma cases are discussed in an open forum to provide the best possible care for patients. For complex fractures, pre-operative treatment plan is formulated during trauma meetings.

Dr. Ramesh Perumal
Consultant

Dr. K. Venkatadass
Consultant

Dr. Devendra Agraharam
Consultant

Dr. C. Arunkamal
Consultant

Dr. P. Velmurugesan
Associate Consultant

Dr. J. Mohamed Zackariya
Associate Consultant

Dr. B. Roy Wilson Armstrong
Associate Consultant

Dr. Sivakumar S P
Associate Consultant

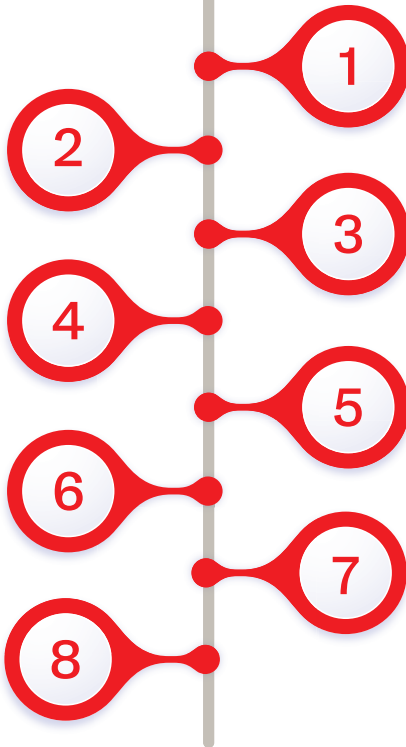

TRAUMA SURGERY: SETTING HIGH STANDARDS

State-of-the-art Trauma Intensive Care Unit

Round the clock Trauma and Emergency services

On arrival anaesthesia (Nerve Blocks) to provide immediate pain relief

Thorough preoperative planning and a definitive treatment plan for all complex fractures

1 Polytrauma team to enable optimal care of critically injured patients with systemic injuries and multiple fractures

3 In-house availability of supportive services like Radiology, Neurosurgery, Blood bank and Bone bank

7 Dedicated and experienced team of trauma surgeons
